

**Amendments to the Specification**

Please rewrite the second paragraph on page 2, line 11 of the specification as follows:

--If only a portion of the document is to be reprinted, then selected pages are reprinted, via step 18. Step 18 may be accomplished using conventional job ticketing, in which the user indicates on a ticket the pages that are to be replaced. Typically, only the erroneous pages are reprinted. The reprinted pages are then inserted into each copy of the document, via step 20. Typically, step 20 is performed manually. Thus, an individual must properly insert each of the pages into each copy in step 20. The old version of the pages that were reprinted is also discarded, via step [[20]] 22.--
